The British Machine Vision Conference is the main UK conference on machine vision and related areas.

FINAL CALL for papers, BMVC 2005

<http://cms.brookes.ac.uk/computing/bmvc2005/>

The British Machine Vision Conference is the main UK conference on machine vision and related areas.

Organised by the British Machine Vision Association, the 16th BMVC will be held 5-8 September 2005 at Oxford Brookes University, Oxford, UK.

We invite authors to submit full-length high-quality papers in image processing and machine vision. Topics include - and are not limited to - the following:

- Statistics and machine learning for vision
- Model-based vision
- Stereo, calibration, and geometry
- Image processing techniques and methods
- Person, face, and gesture recognition
- Texture, shape, and colour
- Motion, flow and tracking

Video analysis

Segmentation and Feature Extraction

Document processing and recognition

Biomedical applications

Vision for visualisation and graphics

All papers will be blind-refereed by at least three members of the international editorial committee.

Successful papers will be presented at the single-track conference. As usual, the proceedings will be published and will be distributed at the conference.

The important dates are:

17 April: Paper submission deadline

19 June: Acceptances announced

11 July: Camera-ready copy submission deadline

5 September: Tutorial, Chris Bishop

6 September: Invited talk (William Freeman, MIT), Sessions

7 September: Invited talk (Michal Irani, Weizmann Institute), Sessions, Banquet at New College

September 8: Sessions

In addition, BMVC will host the Workshop on Human Activity Recognition and Modelling (HAREM), to take place on 9th September. See details on the HAREM web site.

We look forward to seeing you in Oxford!

William Clocksin, General Chair

Andrew Fitzgibbon and Phil Torr, Programme Chairs
